New Lalazar - 47044, Rawalpindi,  
Punjab, Pakistan

I am a skilled web developer with expertise in both Web2 and Web3 technologies. I am actively seeking a secure and responsible career opportunity where I can leverage my skills and training to make a significant contribution to the success of a company. With a passion for creating innovative solutions, I am eager to apply my knowledge of web development to deliver dynamic and effective solutions that meet business needs and drive growth,

## Employment

**MERN & PERN Stack Developer** Feb 2023 - Present  
Finite Lead - Rawalpindi

I began my career as a full stack developer, utilizing my skills in both front-end and back-end development to create dynamic and interactive web applications. With a strong foundation in programming languages and frameworks, I am able to design and implement effective solutions that meet client needs and deliver exceptional user experiences.

## Education

**Bachelor of Science in Software Engineering** Sep 2020 - Present  
Foundation University School of Science & Technology

I am currently studying Software Engineering, gaining experience in programming languages, software design, data structures and algorithms, software testing, and project management. This education is providing me with a strong foundation in software engineering and preparing me to deliver high-quality software solutions.

## Achievement

Positioned as a full stack developer while still a student of software engineering, I gained valuable hands-on experience and applied my theoretical knowledge to real-world projects. I am proud of this accomplishment and eager to continue developing my skills.

My passion is to continuously learn and master new and modern technologies and tools to build software that provides ease and convenience to users. My aim is to deliver the best and attractive UI and UX to the end users to add end goal in the life of software.
